

Build Stronger Logistics, Brick by Brick

Moving building materials is tough — but Redwood's customized approach creates a solid foundation for success.

Achieving on-time, in-full delivery to construction or work sites is challenging, especially when you're facing these challenges:

Oversized, odd-shaped, or heavy loads

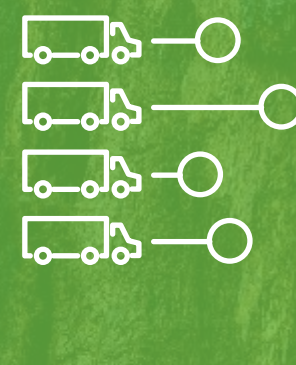

Special handling and equipment needs

Regulatory compliance and permitting

Strict safety and quality protocols

Fragmented shipments from multiple suppliers

What Building Materials Customers Can Expect from Redwood:

- Decades of experience solving specific challenges of building material logistics, from raw materials to construction sites, manufacturing facilities, and warehouses.
- Excellent customer support with proactive updates and efficient issue resolution.
- Providing custom and flexible logistics solutions to adapt to evolving project needs.
- Access to a vast network of carriers with specialized modes and transportation resources specifically for building materials.
- Cutting-edge supply chain tech paired with best-in-class logistics execution.
- Tailored supply chain plans to optimize inventory, minimize costs, and connect your systems.
- In-house project management expertise.

R

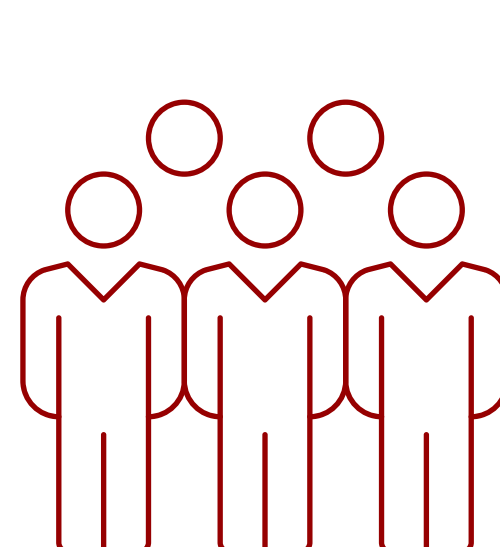

Redwood understands the special needs of chemical and synthetic materials shippers — and we react to those requirements with a unique blend of capabilities. No one has greater bench strength than Redwood. Consider these advantages:

1

Deep industry knowledge

We have decades of experience solving the tough challenges of building materials supply chains. Count on us to understand and meet your needs.

2

Customized approach

Redwood delivers a full range of capabilities, including managed services and technology solutions, that can be tailored to your short- and long-term needs.

3

Outstanding service

You're managing fragmented shipments, "ugly" loads, multiple pickup and delivery sites, careful route planning and tight deadlines. Redwood is built to handle complexity. Find out why we have a 98% customer retention rate.

4

Cost control

All that complexity can add up to a high price tag. But Redwood works to minimize costs via route optimization, load consolidation, a flexible carrier mix and other curated strategies.

5

Advanced technology

Redwood leverages best practices and best-in-class solutions to maximize your end-to-end visibility and control. That leads to more transparency for your team, and better service for your customers.

Redwood's Capabilities Are Custom, Not Builder-Grade

As a modern, full-service 4PL, Redwood allows you to mix and match the best-fit logistics services and technology solutions — like helping to select the ideal product types for your client's next project. Redwood delivers best-in-class:

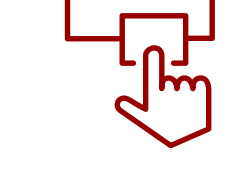

Truckload shipping

Less-than-truckload shipping

Parcel execution and spend management services

Project logistics

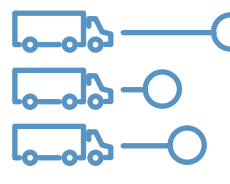

Cross-border logistics

Managed transportation

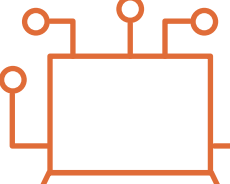

Warehousing and distribution

Freight brokerage

Sustainability tracking and improvement

Systems integration

You need to meet mission-critical, multi-site deadlines while facing tough logistics challenges. We get it. Let's build powerful results together.

It all begins with one simple step.

To minimize your risk and maximize your confidence, let's begin with a free assessment of your logistics needs. Meet with Redwood's team of building materials industry experts, and let them analyze your needs and objectives. They'll create a blueprint for your logistics success.
