

Redwood Knows the Formula for Chemical Success

From molecule to market, Redwood delivers your chemical and synthetic products on-time, on-budget, safely and compliantly.

Optimizing any shipment for cost, service, safety and sustainability is tough in today's volatile market. Chemicals & Synthetic materials shippers face these added challenges:

Hazardous materials handling protocols

Special packaging and equipment

Regulatory compliance and permitting

Critical need for 24-7, real-time visibility

Fast, effective crisis management

What Chemicals & Synthetic Products Customers Can Expect from Redwood:

- Deep understanding and knowledge of the unique challenges of chemicals and synthetics transportation, along with their complex regulations.
- Balancing safety & compliance with cost-effective and efficient solutions
- Environmentally friendly practices like fuel efficiency and waste minimization
- Real-time insights into inventory levels, customer buying trends, and local preferences.
- Extensive network of chemical and synthetic materials compliant carriers.
- Cutting-edge supply chain tech paired with best-in-class logistics execution.
- Tailored supply chain plans to optimize inventory, minimize costs, and connect your systems.

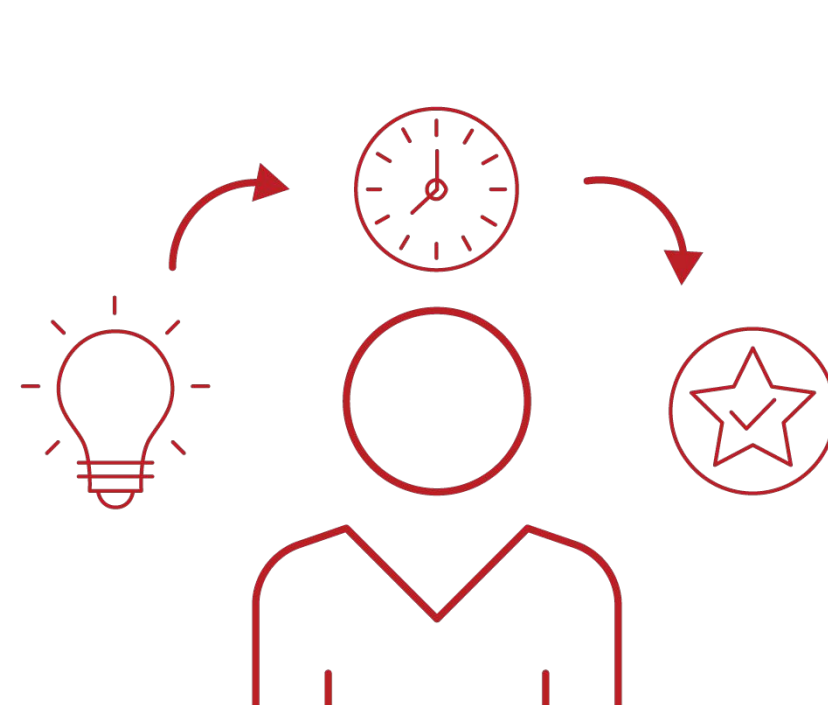

R

Redwood understands the special needs of chemical and synthetic materials shippers — and we react to those requirements with a unique blend of capabilities. No one has greater bench strength than Redwood. Consider these advantages:

1

Hands-on experience

We have decades of experience moving chemicals and related products. Redwood understands your haz-mat, compliance, equipment and safety requirements.

2

24-7 visibility and support

From real-time tracking to 24-hour emergency support, you can count on Redwood to be there, managing the special needs of every single shipment.

3

Flexible capacity

You need to deliver on-time and in-full, even for partial loads. Redwood's flexible, high quality capacity enables you to combine flawless delivery performance with cost control.

4

Risk management

Transporting chemical or synthetic materials involves inherent risks, including damages, accidents, pollutants, and spills. Redwood's strict risk management protocols mitigate your exposure and support safe delivery.

5

Advanced technology

Redwood leverages both best-in-class technology and related best practices to maximize your end-to-end visibility, awareness and control.

Your Needs, Redwood's Capabilities: The Perfect Fusion

Redwood is a modern, full-service 4PL, with a list of comprehensive capabilities that rivals the periodic table. That means you can mix and match logistics services and technology solutions to create the perfect formula for your success. Redwood delivers:

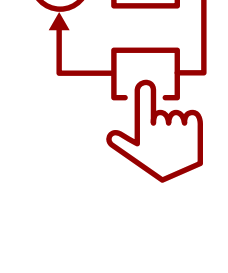

Truckload shipping

Less-than-truckload shipping

Parcel shipping and advisory services

Project logistics

Cross-border logistics

Managed transportation

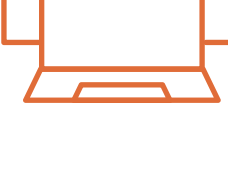

Warehousing and distribution

Freight brokerage

Sustainability tracking and improvement

Systems integration

At Redwood, we've spent decades mastering the special challenges of chemical and synthetic materials logistics. We can minimize your costs and risks, while maximizing your supply chain performance and customer satisfaction.

Take the first step today

Successful chemistry begins with experimentation. Why not meet with Redwood's team of chemical industry experts — and let them analyze your current state and your future vision? Schedule a no-cost, risk-free assessment of your logistics needs today.
