

PRE-LAUNCH SYSTEMS CHECK:

ARE YOU READY FOR ORACLE'S
END-OF-SUPPORT DEADLINE?

The countdown is on.

Oracle is sunsetting support for on-premises OTM and GTM, and staying grounded isn't an option. This quick, no-fluff checklist helps logistics and IT leaders evaluate how prepared they are to move and highlights the mission-critical steps to act now.

Redwood has already helped dozens of companies make the move. This is how readiness starts.

1

RISK SIGNALS

- ☐ Still running Oracle OTM or GTM on-premises despite the sunset deadline?
- ☐ Unclear how much cost, risk, or disruption a delayed migration may create?
- ☐ Noticing slower performance, patchwork workarounds, or security concerns?

2

STRATEGIC ALIGNMENT

- ☐ Do logistics and IT have a shared roadmap for cloud migration?
- ☐ Have you defined what success looks like in Oracle Cloud in terms of ROI, performance, and functionality?
- ☐ Are critical systems, data flows, and integrations mapped and accounted for?

3

MISSION-READY PARTNERSHIP

- ☐ Do you have a partner that understands Oracle Cloud and the logistics beneath it?
- ☐ Has your migration timeline been tested against real-world operational complexity?
- ☐ Have you had your readiness assessed by an expert, not just your internal team?

YOUR READINESS SCORE

7–9 checks: You're cleared for launch. Redwood can help you accelerate safely.

4–6 checks: You're close, but alignment and timeline clarity are mission-critical.

0–3 checks: You're grounded. Redwood's cloud migration team can guide your next move.

WHAT'S NEXT?

The Oracle clock is ticking. But Redwood is already in orbit.
