

MISSION CRITICAL: MIGRATE FROM ORACLE ON-PREMISES

Why delaying your migration to Oracle Cloud might be your most expensive risk.

YOU'VE SEEN THE COUNTDOWN.

Oracle is ending support for on-premises OTM and GTM in November 2026.

But beyond the loss of support, the real cost of staying behind lies in operational drag, hidden risks, and lost ROI.

HERE'S WHAT THAT DELAY IS REALLY COSTING YOU AND **HOW REDWOOD CAN HELP.**

35%
PERFORMANCE
GAIN

Manufacturers moving to Oracle Cloud with Redwood have unlocked up to 35% faster GTM processing speeds.

Why it matters:

Lagging GTM systems don't just delay shipments, they create bottlenecks in your global trade flow. Faster throughput means faster revenue recognition.

2.2x
FASTER ROI

Migrations to Oracle Cloud achieve ROI more than twice as fast.

Meaning:

Faster payback, less tech debt, quicker alignment with the C-suite.

6-8
WEEKS SAVED

Cloud-enabled sustainability planning is up to 8 weeks faster.

Real impact:

Get ahead of ESG targets and Scope 3 emissions sooner.

1,800+
FEATURES
MISSED

Since Oracle 6.5.3, over 1,800 cloud-only updates have been released.

What you're missing:

AI forecasting, real-time shipment visibility, and automated compliance.

2.3x
LOWER TOTAL
COST OF
OWNERSHIP

Cloud deployments cost 2.3x less than on-premises over time.

Estimate:

Up to \$3M in savings over 5 years for mid-sized logistics teams.

THE LONGER YOU WAIT:

**ROI
DROPS**

**RISK EXPOSURE
CLIMBS**

**OPERATIONAL
INEFFICIENCY STACKS**

**WAITING INCREASES RISK.
REDWOOD REDUCES IT.**

You don't need more time, you need a partner who's mapped the route.
