R

No one understands these needs better than Redwood — and no one is more qualified to meet them.

Discover the Redwood advantage.

1

Proven value generation.

Redwood has delivered millions of dollars in transportation savings, network analysis and other financial benefits for diverse portfolio companies.

2

Deep logistics expertise.

Hundreds of companies rely on Redwood for consulting, cost savings, technology implementations, brokerage, hands-on execution and other solutions.

3

Private equity experience.

Redwood has helped leading PE firms with due diligence, as well as increase value post-acquisition.

4

Fast returns

PE firms can't wait years to see results. Redwood knows how to identify the big wins and capture them quickly.

5

Objectivity

Because there is no one-size-fits-all logistics optimization journey, Redwood is service- and solution-agnostic.

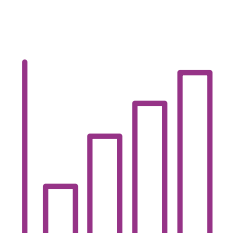

6

Full-service, modern 4PL model

Redwood not only understand value creation and financial performance but can also drive out costs associated with an organizations everyday operations.

What exactly does Redwood deliver?

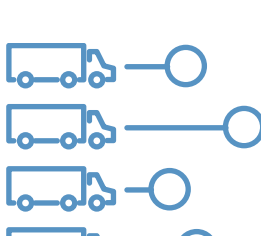

Whatever challenge a portfolio company is facing, Redwood offers a variety of logistics services including:

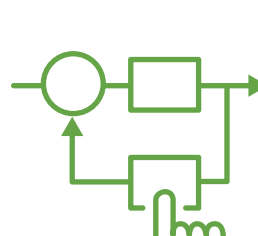

Market Spend analytics

Network analysis and design modeling

All mode procurement for optimized savings

Digitalization and systems integration

Managed transportation

Warehousing and distribution

Freight brokerage

Shipment execution, from truckload to parcel

Sustainability tracking and improvement

Cross-border logistics

By improving the logistics infrastructure — adding a new network model, a transportation management system, or procurement optimization—**Redwood is creating transferable value that generates ongoing returns for investors.**
