OUR PREMIUM SERVICES

Pre & Post Solution Analytics

Our Engineering & Reverse Solutions teams collaborate with your team to establish and maintain solution parameters, business rules & requirements, mitigate risk & costs to align expectations and define what metrics are needed to measure success.

Custom Engineered Solutions

Over years of experience, we have baselined a number of best practices and engineered processes for all types of solutions, however, we also realize that EACH solution must be customized to meet the subtle nuance of each reverse logistics operation, budgetary restrictions and service requirements.

White Glove Services

With a wide array of specialty equipment, warehouse and process options that can integrate with date/time specific requirements, Redwood Command & Control will assure process compliance and complete transparency.

Robust Warehouse & Brokerage Support

Our Reverse Logistics & Engineering Teams have the full support of one of the largest, most powerful multi-modal brokerage and warehouse operations in the industry.
