

Integrate Your TMS for a Greater Return

In today's volatile supply chain environment, logistics teams need real-time visibility, orchestration, and responsiveness to thrive. However, many struggle with disconnected systems and data that hinder their ability to adapt quickly. Redwood provides tailored TMS solutions and integrations that connect directly to other critical systems in your supply chain — delivering real-time visibility and responsiveness across your end-to-end operations.

Why REDWOOD®?

- **500+ Successful Implementations**
- **\$7B Transportation Spend Running through RedwoodConnect**
- **20+ Years TMS Implementation Experience**

**Accelerated
Value,
Unmatched
Agility &
Complete
Control**

Don't let disconnected systems and manual processes slow you down. **Redwood's System Integration team** rapidly transforms your fragmented resources into a unified, high-performing infrastructure. Experience faster time-to-value with streamlined implementation, gain the agility to adapt to market changes in real-time, and maintain complete control over your end-to-end operations. We partner with leading technology providers to ensure a seamless integration experience, tailored precisely to your unique business needs.

Accelerate Your Time to Value

- **Real-Time Visibility:** Gain immediate, actionable insights into your shipment status, inventory levels, and carrier performance — empowering proactive decision-making.

- **Seamless Connectivity:** Rapidly integrate your TMS, WMS, ERP, and other critical systems for a unified and actionable view of your supply chain.

- **Automated Workflows:** Streamline operations and eliminate manual tasks, reducing errors and accelerating processes for increased efficiency.

- **Data-Driven Insights:** Leverage advanced analytics to identify hidden opportunities, optimize routes and make informed decisions that drive profitability.

- **Scalable & Flexible:** Our solution grows with your business, adapting to your changing needs.

Connected Systems = Accelerated Value and Control

RedwoodConnect is the only platform that unites all your scattered systems, processes, and data. It works seamlessly with the TMS solutions we provide, creating a dynamic ecosystem that shares insights and goals across your entire supply chain. No matter what TMS or technology you use, **RedwoodConnect** is a plug-and-play, cloud-based solution that makes it easy to connect everything.

Expert Advisory and Implementation

Redwood's Systems Integration group delivers award-winning supply chain SaaS advisory and implementation services. Redwood offers unique and innovative execution options, some of which we've actively employed within our own operations. By leveraging our in-house technology and proprietary solutions like RedwoodConnect, we'll help you optimize your supply chain without adding internal IT resources. Our dedicated project teams ensure a collaborative and efficient integration experience, tailored to your business' specific needs.
