Set It and Forget It

From cost pressures to supply chain disruptions, energy companies face many challenges. Managing multimodal transportation shouldn't be one of them. By contracting with Redwood for freight brokerage services, energy companies can "set it and forget it" — and instead focus on their core business. Count on Redwood to identify the best means of transport — whether road, ocean or rail — and deliver products safely, reliably and cost-effectively. Redwood can match your needs with network capacity in real time.

Match with Specialized Capacity in Seconds

Energy companies have special capacity needs. Redwood's Rating API tool finds that capacity in seconds:

1. Your TMS sends shipment details to Redwood API server.
2. LoadRunner conducts automated analysis to quotes
3. You Receive bookable rates from API server.
4. With one click, you're guaranteed capacity.

Redwood Delivers Real-Time Visibility

Whether you're contracting with Redwood to ship a one-time spot load, manage a seasonal peak or leverage turnkey long-term freight services, you'll have real-time visibility at every step. Not only does Redwood increase your confidence, but it frees your internal resources, saving time and money with every freight transport.

Energize Your Cross-Border Movements

The only thing more challenging than shipping energy products? Shipping them across borders. With three offices and 120 logistics experts in Mexico — and 25,000 cross-border shipments annually — Redwood helps master the complexities of cross-border logistics, moving your shipments quickly and cost-effectively.
