

Flexible Freight Capacity? Redwood Has You Covered

As a top freight broker, Redwood is uniquely qualified to deliver the right transportation asset at the right cost.

As they search for carriers that combine flexible capacity, buying performance analytics and rate benchmarking, shippers face these challenges:

Limited buying leverage

Rate volatility

Limited carrier options

Cross-border complexities

Lack of real-time visibility

R

Redwood Moves Your Business Forward, Reliably

Wherever you're going, Redwood can help you get there — fast, reliable and affordably. Redwood is a top 15 North American freight broker, moving over 1200 domestic loads every day and more than 2000 cross-border loads every month. Our network of 44,000 carriers gives you access to 435,000 pieces of third-party equipment, as well as our own private fleet. Redwood's proprietary LoadRunner solution matches your freight with capacity in seconds. But we can also address your special needs like long-term contract negotiation, project logistics and cross-border shipping.

Discover the Redwood advantage.

1

Flexible capacity you can count on.

With its dedicated private fleet, asset-like carrier network, proven freight brokerage expertise and technology innovation, Redwood is ready to help master your capacity challenges. We can leverage our vetted carrier network and purchasing volumes to ensure cost-effective, reliable freight movement, even in volatile markets. Our dedicated brokerage team exceeds customer expectations and ensures clear communication. There's a reason why Redwood's average customer relationship is over nine years.

2

Carrier matching in seconds.

Redwood's proprietary LoadRunner transportation management system (TMS) synchronizes your specific freight-shipping needs in real time with network capacity for full-truckload, less-than-truckload, intermodal and parcel shipping. Your in-house TMS sends the shipment details to Redwood's API server, then LoadRunner conducts automated analysis to provide carrier quotes. Within seconds, you receive bookable rates from Redwood — and can secure capacity with a single mouse click.

3

Real-time visibility and awareness.

Redwood's established carriers and asset-like solutions are all digitized to create visibility, awareness and confidence. You'll enjoy transparency and peace of mind by watching your shipments move toward their final destinations in real time. In today's volatile shipping landscape, it's impossible to eliminate disruptions. But when exceptions do occur, you'll be the first to know. And Redwood will leverage advanced technology to minimize your risk exposure, by identifying and executing a solution that optimally balances cost with service.

4

Customized solutions.

As a modern 4PL, Redwood is uniquely positioned to address every capacity challenge facing shippers. We provide flexible freight brokerage services, whether you're dealing with a one-time spot load, managing a seasonal peak or negotiating a long-term carrier contract. No load is too big or too small. And no need is too specialized. From project logistics and temperature control to white-glove handling, we deliver capacity, and value, for your business.

5

Across the country, or across the border.

Redwood moves over 2,000 loads monthly across the Mexican and Canadian borders. We've established an especially strong presence in Mexico, with more than 150 bilingual experts, a network of over 200 carriers, and six strategically located facilities. As it manages over 30,000 cross-border shipments annually, Redwood Mexico masters the complexities of customs and international regulations — so our customers don't have to.

Need Capacity? You've Found It.

Given today's rate volatility — coupled with growing customer expectations — you need a freight broker you can count on. That's Redwood. With two decades of hands-on experience and hundreds of satisfied customers, we've never met a capacity challenge we couldn't answer. Start combining flexibility, reliability, and cost-effectiveness by reaching out to Redwood today.
