

# RedwoodConnect: The Power of Integration

Global logistics is a complex job, often hampered by siloed data and a lack of real-time visibility across multiple systems. Transform your disparate resources into a unified, aligned ecosystem with RedwoodConnect — the only integration platform purpose-built for logistics.

## Delivering Maximum Impact:

**Accelerate decision making**  
with unified real-time data.

**Mitigate supply chain risks**  
with proactive issue detection  
and rapid response

**Improve supply chain performance**  
through streamlined processes  
and enhanced visibility.

**Increase operational effectiveness**  
by breaking down data silos and  
automating workflows

**Maximize resource utilization**  
by empowering logistics teams  
and reducing IT overhead.

**Strengthen carrier relationships**  
through simplified onboarding  
and effective management

## Align Your Systems and Data for Agility

Today's volatile supply chain landscape demands rapid, data-driven decisions. RedwoodConnect's ability to unify disparate systems and provide real-time visibility empowers you to overcome challenges like data fragmentation and delayed responses. Our plug-and-play approach and robust marketplace of pre-built connectors accelerate implementation, allowing you to transform quickly and cost-effectively.

## Transform Quickly and Cost-Effectively

RedwoodConnect is a plug-and-play solution, designed for a rapid launch and a dramatic transformation. This cloud-native, flexible solution makes it easy to drag and drop software, systems, processes, and partners to create your own customized digital ecosystem. All your logistics activities are connected, sharing a central data source.

## Future-Proof Your IT Investments

You've invested in technology systems, IT staffing, vendor partnerships, processes and other assets. RedwoodConnect transforms them into a living, breathing ecosystem that's easy to scale to your changing needs. Enjoy long-term flexibility, increased asset utilization, and a higher ROI by integrating once with RedwoodConnect.

### Collaborate Securely and Seamlessly

RedwoodConnect enable seamless, secure internal connectivity, while also extending visibility and real-time collaboration to your trading partners, customers, and carriers. You can automate EDI transactions and other communications, with full confidence in Redwood's strict protocols for data privacy, security and legal compliance.

### By the Numbers

- \$3B+ Platform Spend
- 600+ EDI Connections
- 250+ Custom APIs
